

Why should I go to the Academic Center for Excellence (ACE) & Science Learning Center (SLC)?

Because we can play a critical role in your academic success! At the ACE and SLC, we offer free tutoring and workshops to all Lehman students in a wide variety of courses. Students who have come to our Centers for tutoring and workshops keep coming back. They discover how valuable it is to work through tough assignments and learn critical academic skills with our experienced tutors and workshop leaders! ACE and SLC tutors are skilled facilitators of learning.

Great! Tell me more!

The ACE offers:

- Tutoring in the humanities, social sciences, and writing
- Workshops in writing, reading, and research across the disciplines
- English conversation groups

The SLC offers:

- Tutoring in the natural sciences
- Pre-semester workshops and semester-long workshops for Physics, Chemistry, and Biology courses
- Computer software for science learning

How will tutors work with me?

In the ACE and SLC, tutors will:

- Help you with many different types of course assignments
- Ask you to bring all relevant class materials with you to the tutoring session
- Ask you questions to promote your critical thinking
- Illustrate how to break difficult tasks into parts or a series of steps
- Help you engage with your coursework by connecting assignments to your day-to-day life and suggesting opportunities for further reading and research
