

Swivl: Editing Videos

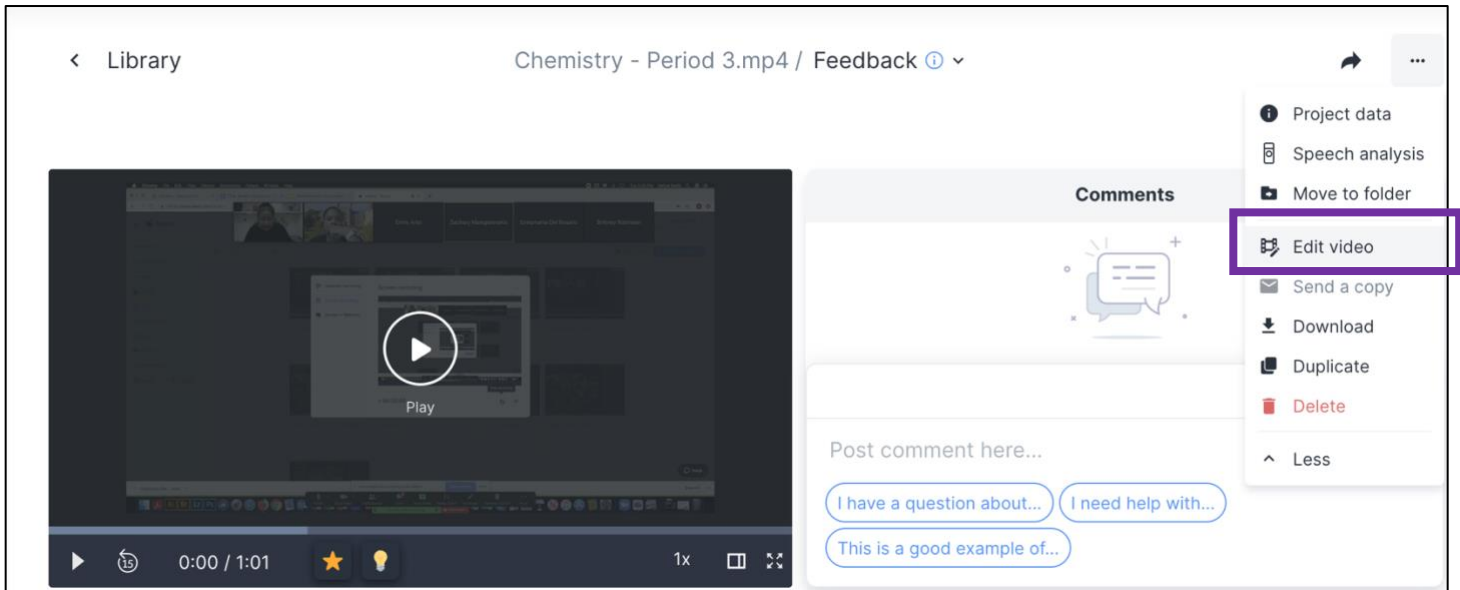

Log into your Swivl account > Videos > Select the video you want to edit

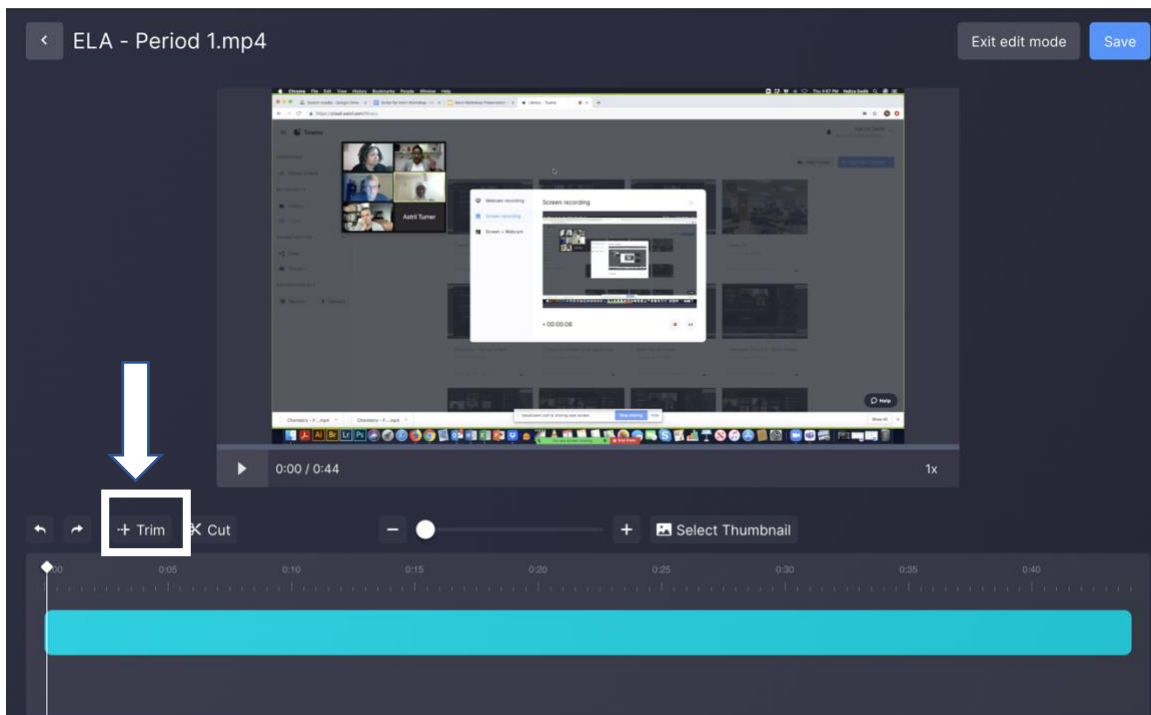

> Click the three dots on the top right-hand corner > More

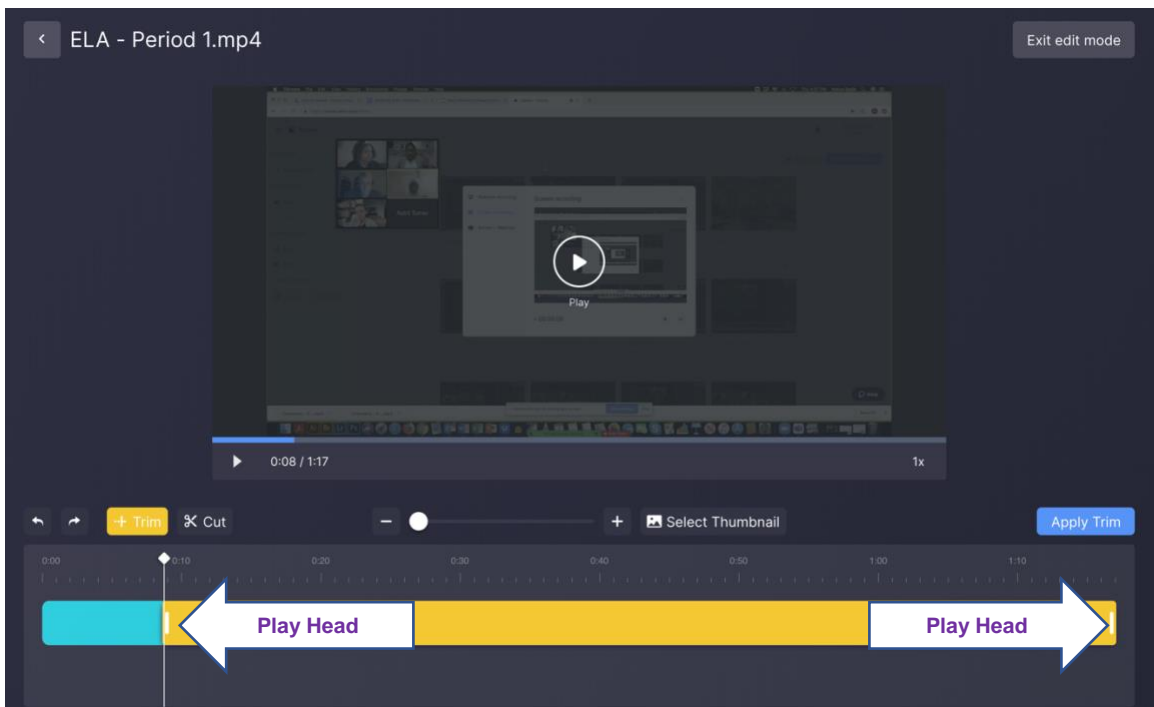

> Select Edit video

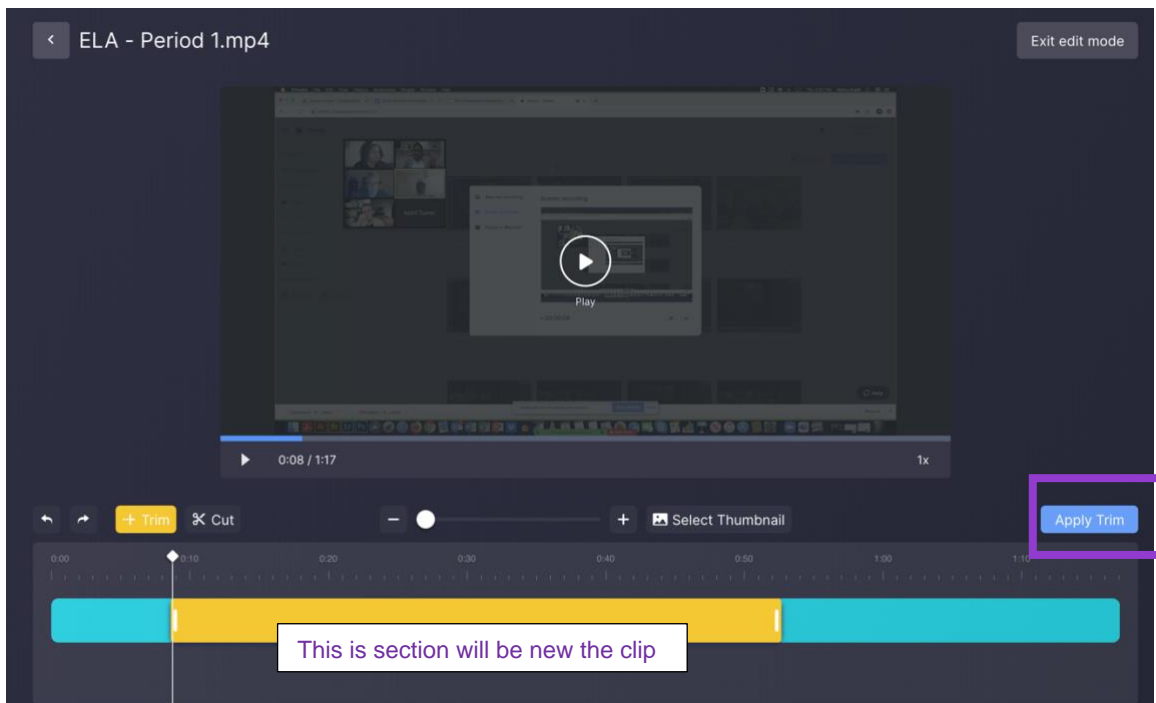

> Click Trim

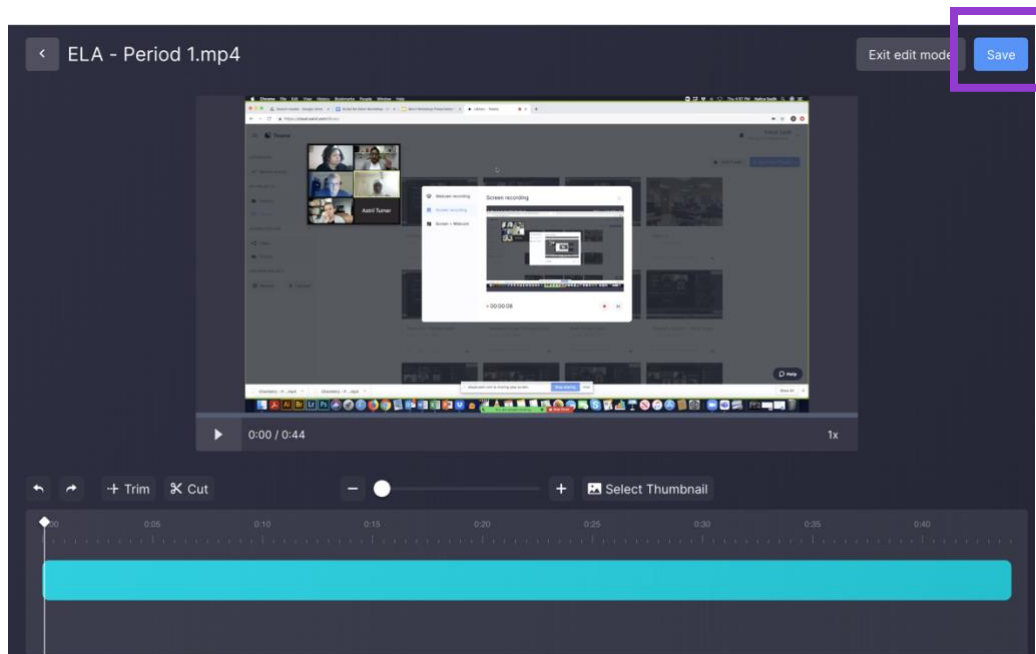

> Drag play head to the chosen start and end points of new clip

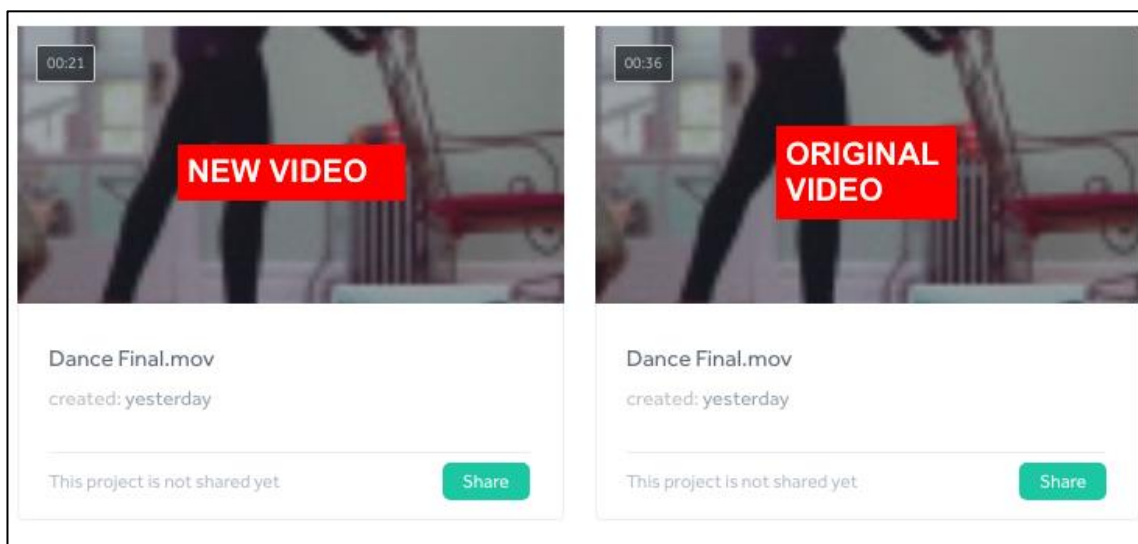

> Click Apply Trim

> Click Save

Your original video and new video will be saved in your library.

Both the full-length original video and the new video will have the same title. Highly recommend renaming the new video.

To Rename Video: Videos > Click on the three dots on the video thumbnail > Edit project info > Add new name > Save
