Fall 2023 Lecture Series

Metamorphosis: How LGBTQ+ History Has Shaped the Music

Smee Wang, Ph.D.

Lecturer, Music, Department of Music, Multimedia, Theatre and Dance

Musicological explorations of the intersection of music and sexuality have a long history. In classical music, composers such as Schubert, Handel, Tchaikovsky, and Britten's sexuality are the most studied. A queer orientation manifests in studies that consider musical practice itself as an extension of sensual/sexual practices and dynamics of power that forge non-normative subjects or erotic relations. This presentation will discuss classical and commercial composers' and performers' works that may be inspired by their sexuality.

Wednesday, October 18, 2023

12:30 – 2:00 pm

In person & Virtual

Carman Hall, Room 338
