

Using FlipVideo camera

Materials checklist:

- FlipVideo camera
- TV cable (optional -- for viewing videos on a television)
- USB extension cable (optional -- for plugging FlipVideo into computers with hard-to-reach USB ports)

To record videos:

1. Turn on camera, by using sliding switch on upper-right side.
2. Press red button to begin recording.
3. Press red button again to stop recording.

To transfer videos to your computer:

1. Access the camera's USB connection by sliding the button on the middle of the left side of camera.
2. Plug this USB connection into your computer
3. When the camera is connected, the FlipVideo software may launch automatically. If it does not:
 - Mac users: click on the FLIPVIDEO volume which will appear at the left in the Finder. Double-click on the file "Flip Video for Mac".
 - PC users: ...
4. Click on **Save Videos**.
5. Select the videos you would like to save, and then click on **Save to Computer**.
6. Click on **Create New Album** and give your album a name. Your videos will now be saved to this album.
7. To disconnect camera from computer, first **Quit** the Flip Video software. Then...
 - Mac users: select File > "Eject FLIPVIDEO" in the Finder.
 - PC users: ...

Uploading Videos to the Web
